

Safety Checklist:

Make sure that you read over this list to see if there are any concerns about your project.

This survey will determine if you have followed all the guidelines for safety, and ethics guidelines. Please answer all the questions.

If the answer is **yes** to any of the Safety or Ethics questions, **immediately contact qrstf@live.com** . You need permission to proceed. You may be required to fill out forms providing details of your research before permission is granted.

1. Does your project use any dangerous / hazardous chemicals? (e.g., fuel, pesticides or herbicides, cleaning supplies, acids or bases, fireworks)
2. Does your project use controlled substances (alcohols, tobacco or prescription medication)?
3. Does your project involve high powered ballistics of any kind? (e.g., cross bow, rifle, potato gun)
4. Does your project employ any home- made wiring that is connected to a 120 v outlet?
5. Does your project employ any 10Ah batteries or greater such as a 12 V car battery?
6. Does your project employ micro-organisms, (such as bacteria, mold, viruses), body fluids or living tissue?
7. Ethics: In your project do you collect data or information by interacting with people (e.g. exercise testing, surveys or perception tests)?
8. Ethics: In your project do you study an animal more complicated than an insect (e.g. fish, octopus, snake, bird, dog etc.)?
9. Are you available for Judges' interviews on April 10th?
